

Environmental Statement

Armourcoat SCULPTURAL™

Armourcoat Limited has a policy of making all products as environmentally friendly as possible from the sourcing of raw ingredients through to manufacture, packaging, application and in-service life of our products.

The main raw ingredients of Armourcoat SCULPTURAL™ are gypsum plaster and 100% recycled mineral filler.

The gypsum plaster is sourced from a large gypsum manufacturer who are dedicated to preserving the environment, and restore all their sites after extraction, to maintain natural equilibrium.

The lightweight mineral filler is made from 100% post-consumer recycled material – and accounts for up to 30 %of the panel content. Armourcoat SCULPTURAL™ panels can count towards USGBC LEED System points under 'Materials and Resources 4' - reducing impacts resulting from extraction and processing of virgin materials.

Whilst every attempt has been made to ensure the accuracy and reliability of the information contained in this document, the information should not be relied upon as a substitute for formal advice. Armourcoat Ltd, its employees and agents will not be liable for any loss or damage, of any kind, arising out of or in connection with the use of this publication. Please refer to the company disclaimer for further details.
